

Creating a Business Card for your Duck

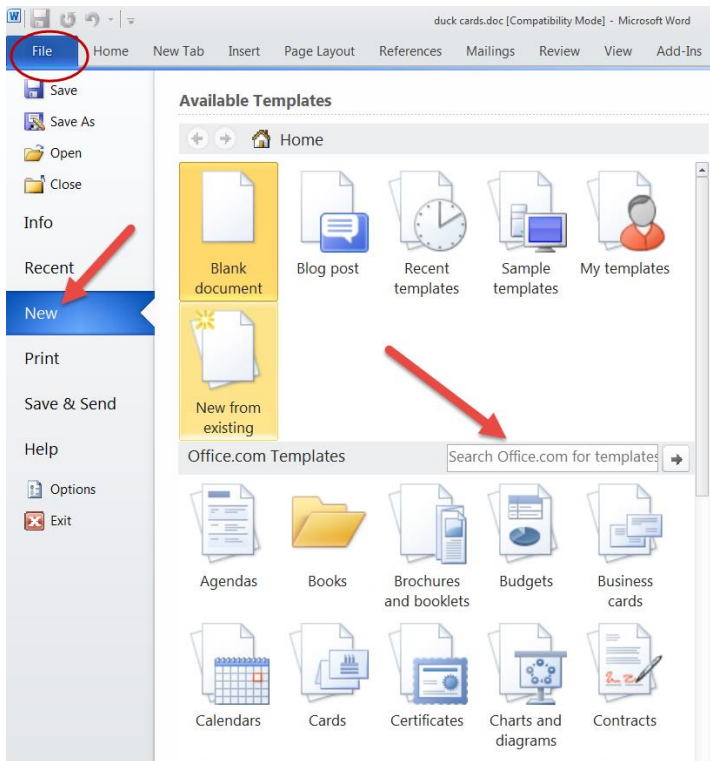

This will come in handy when you make a connection and someone asks you, "Hey, what's up with the duck?" Just hand them a card!!! I made one for Bo and it really helps from explaining to everyone what I'm doing with him.

When you are just starting out with a business and money is tight, sometimes you have to make do with what you have. Even though a lot of inexpensive printing options are available, maybe you can't afford to get pretty business cards printed yet. Or maybe you haven't met many people, so you only need a few cards for right now.

Printing your own business cards can be an extremely affordable option. If you have Microsoft Office, you can easily create your own custom business cards in Microsoft Word.

- Go to File
- Click on NEW
- Type in 'Business Cards' in the menu option

Once you have options, select the style you like, download and begin to put in your own information.

Daffy Duck 
World Traveler

Daffy was brought into this world as a long term project for my 5th grade class. Together we will go on adventures, take many pictures, meets lots of people and make many memories. Thanks for being a part of my project.
